

Good morning students!

**Today's themes are: the
Circulatory System (*the
heart and blood*)**

The Circulatory System (getting blood to the entire body)

Tell me what you remember from the video?

- A body has _____, _____ is a liquid
- The _____ moves blood **through the body**, it's like a pump that pumps blood into the arteries
- _____ are long tubes that go to parts of the body
- Blood brings _____ and _____ to the body
- _____ are also long tubes, they bring blood **back to the heart**
- **The part of the body that moves blood is called: _____**

LET'S GET TO WORK!

2 Groups -- everyone will get to do everything today!

- Scratch Programming Team
- Robotics Team

Scratch Programming Team -- Scratch Challenge!

- Describe the Circulatory System and its parts in your animation!
- Ask anyone on the STEM Team if you need help!

Robotics Team

SWAP

Now it's time to swap teams everyone!
Break down your robots and clear your
Scratch programs!
